

M.Sc ENVIRONMENT SCIENCE

Semester I

- Geo-Environment and Meteorology
- Ecological Principles
- Environmental Chemistry & Toxicology
- Solid Waste Management & Techniques

Semester II

- Introductory Physics, Mathematics and Statistical Applications
- Conservation of Life Support System
- Environmental Pollution
- Environmental Analysis: Techniques and Instrumentation

Semester III

- Regional & Global Environmental Issues
- Environment Impact Assessment and Auditing
- Environment and Energy Management
- Industrial & Biomedical Waste Management

Semester IV

- Environmental Technology
- Environmental Biotechnology
- Project
- Seminar
